Non sono solo il design e le tecnologie a fare la differenza nei prodotti MYYOUR: anche per quanto riguarda i materiali l'azienda padovana oggi è in grado di esprimere il massimo grazie a un nuovo polietilene speciale denominato Poleasy, messo a punto attraverso un lavoro di ricerca durato anni con l'obiettivo di eliminare quelle microporosità superficiali responsabili della formazione di antiestetiche patine e, nel tempo, anche di possibili fessurazioni.

Poleasy, risolve definitivamente il problema garantendo alle creazioni MYYOUR superfici più compatte e performance davvero uniche in fatto di durata, lavabilità e brillantezza dei colori.

Design and technology are not the only factors that make the difference in MYYOUR products: also because, as far as the materials are concerned, this company, which is based in Padua, Italy, is able to fully express itself thanks to a new and special type of polyethylene called Poleasy.

Poleasy was developed after long years of research. In fact our research was focused on finding a way to eliminate the microporous surfaces that are responsible for the formation of anti-aesthetic patinas or cracks over time.

Poleasy, has entirely solved this problem by ensuring compactness to the surfaces of MYYOUR's creations and a better performance in terms of durability, washability and color brightness.

Myyour

La continua ricerca ed evoluzione porta MYYOUR a scoprire sempre nuovi orizzonti. Il different concept diventa different finishing: MYYOUR presenta l' "ossidato" nei colori rame e ruggine.

L'accurata lavorazione, che mette in symbiosi due materiali chiaramente agli antipodi, prevede l'utilizzo di particelle di ferro come rivestimento, il cui processo di ossidazione viene attivato da prodotti specifici e bloccato da un'apposita vernice trasparente, che ne permette l'utilizzo all'esterno. Così facendo il materiale plastico trasforma la sua natura diventando metallico. Inoltre, essendo il procedimento di ossidazione eseguito manualmente, ogni articolo è unico.

The continuous research and development leads MYYOUR to discover new horizons. The different concept becomes different finishing: MYYOUR presents the "oxidized" in the copper and rust colors.

The careful manufacturing, which puts in symbiosis two materials clearly poles apart, involves the use of iron particles as a coating, whose oxidation process is activated by specific products and stopped by a special transparent varnish which allows the outdoor use. In this way the plastic material transforms its nature becoming metal, it is evident in the fact that a magnet is attracted to it. Since this is a purely manual processing, makes each item different and unique.

Traguardo che sembrava impossibile da raggiungere solo qualche anno fa, oggi la verniciatura del polietilene è una splendida realtà: densa e compatta, liscia e dall'aspetto quasi metallico, impreziosisce i prodotti My your con livree di grande impatto.

Tutto merito di ricerche scientifiche, test e sperimentazioni che hanno portato all'individuazione della giusta formula per un primer in grado di esaltare le caratteristiche della plastica, garantire un solido ancoraggio e superfici lisce e senza fori.

Dopo l'applicazione di questo esclusivo sottofondo, ogni pezzo viene accuratamente carteggiato a mano: tre attente mani a spruzzo e una sapiente cottura fanno il resto, dando vita ai ricercati e suggestivi colori Myyour, capaci di resistere alle intemperie e di vivere intatti, a lungo, nel tempo.

This goal seemed almost impossible to attain a few years ago. Today, coating polyethylene has become a wonderful reality: dense and compact, smooth and almost metallic-like... it embellishes and greatly impacts My your products.

This was made possible thanks to the scientific research, tests and experiments that brought to light the right formula. We have now obtained a primer that is able to exalt the characteristics of plastic and to ensure a durable application on smooth surfaces and without ever having to drill a hole.

After applying this unique background layer, each piece is carefully sanded by hand: three careful coatings are sprayed on the product and a trip to the oven does the rest. All of this contributes to the much desired and beautiful colors of Myyour, which are weather resistant and able to remain intact over a long, long period of time.

I vasi Gem si ispirano al taglio delle pietre preziose, dal micro al macro, giocando sul filo dell'esagerazione.

Oggetti dove il dettaglio di un segno solitamente microscopico diventa l'elemento distintivo che caratterizza l'intera collezione in tutti i suoi formati. Arredi la cui presenza monolitica e raffinata diventa protagonista riuscendo ad adattarsi in maniera quasi camaleontica agli stili di ambienti più diversi.

Oggetti allo stesso tempo eleganti o informali, per interni o esterni, per uso domestico o contract capaci di valorizzare con la loro presenza qualsiasi contesto.

Gem pots are inspired by the cut of precious stones, from the micro to the macro, playing on the edge of exaggeration. Objects where the detail of a usually microscopic sign becomes the distinctive element that characterizes the entire collection in all its formats. Furniture whose monolithic and refined presence becomes the main character, managing to adapt in an almost chameleonic fashion to the styles of different locations. Objects that are at the same time elegant or informal, for indoor or outdoor, for home or contract use, able of enhancing any context with their presence.
